Letter from the CEO

The road to Endoca started with the desire to offer people a better quality of life, naturally without compromising their health. In my student days digging through the university archives. I found studies on epilepsy patients that had trialled cannabidiol and had displayed promising results.

This led to further research into the compound, where I discovered I was able to breed a variety of hemp that contained enough CBD, and at the same time contained all the other macromolecules that were present in the original hemp plant.

My goal was to help change the world's perception of cannabis by making non-psychoactive cannabinoids available online. Since then we have dedicated our time to creating extracts that are clean, pure and sustainably made. In 2010 Endoca launched, with our name taken from the **Endoca**nnabinoid system. To this day this system is a hugely underexplored area in science and medicine.

The online shop was the first in the world to sell CBD online. My goal was to make non-psychoactive cannabinoids, principally CBD, available to customers who needed them globally.

Everything I made was built from scratch by investing slowly, using funding from all of our customers who were happy to pay for our products. Eventually, we could produce more products, help more patients, and spread the word.

We strive to make CBD globally available and affordable without compromising the quality. As we grow, we are bringing local farmers onboard and provide them with the know-how and equipment to grow hemp for Endoca.

We will continue to support organic agricultural practices giving farmers the means and land to make more ecological choices. By doing all of this, we hope to continue to produce clean hemp, make a positive impact on the global ecology and help reduce the global pollution problem.

Welcome to the family!

WHAT IS CBD?

CBD, or Cannabidiol, is a naturally occurring compound, also known as a “cannabinoid,” found in cannabis and hemp plants. As well as CBD, the cannabis plant contains between 70 - 100 other cannabinoids.

It interacts with your body through your endocannabinoid system (ECS), the vast system that controls your body’s general state of balance (otherwise known as homeostasis). The ECS regulates everything from mood, memory, the immune system, pain signaling, and inflammatory response. cbd has shown to help support functions such as appetite, mood, immune response, pain, sleep, and many more. By supporting our ECS through CBD use, we’re returning our body back to its optimal state.

Most people have heard of a cannabinoid called THC which is the ingredient in cannabis that makes users feel high. Unlike THC, CBD is a non-psycho-active cannabinoid and does not cause a high.

CO_2 EXTRACTION

Basically, supercritical fluid extraction with CO_2 can create a pure product filled with the beneficial extracts you need!

You don’t need to compromise on the quality and purity.

SKINCARE & BODY CARE

HEMP SALVE

Support your skin, and it supports you!

Made with 100% natural and organic food grade ingredients. CBD administered topically is absorbed directly through the skin. A soothing skincare product for instant relief from irritation, excessive dryness, broken skin, sore muscles, back aches and sore joints. An antioxidant is a chemical compound that protects cells against the effects of free radicals. Use our hemp salve as a natural and healthy way to experience instant relief in sensitive areas or broken skin. It can also be used all over the body and is especially good for dry lips, elbows and cracked heels.

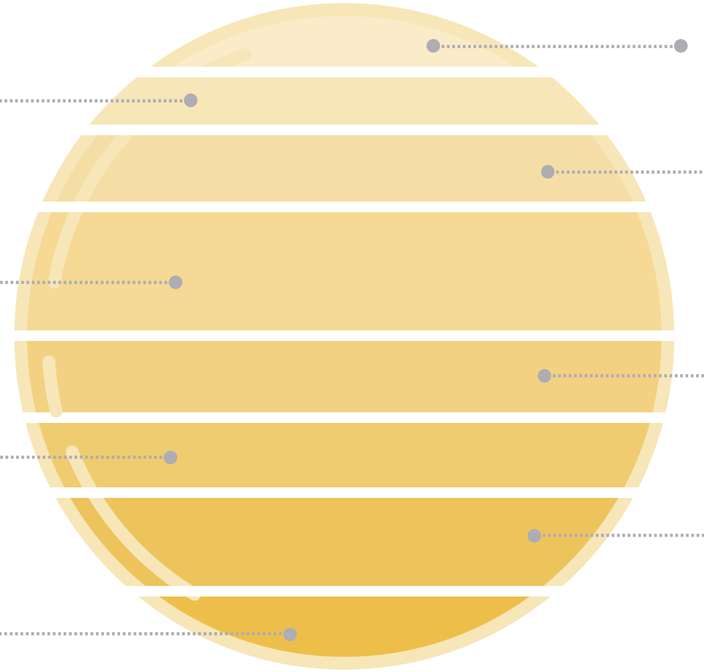

Ingredients

CBD hemp oil (cannabidiol 750mg), coconut oil, beeswax, cannabis sativa seed oil, citrus medica limonum (lemon) peel oil, citral, vanilla and vitamin E. All-natural food-grade ingredients and no synthetic fragrances. *Cannabidiol (CBD) is a natural constituent of the hemp plant. No preservatives, artificial colors, vegan, gluten free and cruelty free.

Available as:
- 10ml / 250mg CBD
- 30ml / 750mg CBD

LIPS+SKIN BALM

Give your lips and skin a treat with our hemp oil lip balm!

Our lip balm only uses organic and ethically sourced natural ingredients: organic hemp oil (rich in omega 6 and 3 and fatty acids), hemp oil extract, organic beeswax, organic coconut oil, vitamin E, vanilla extract, limonene and honey. This powerful Lip+Skin formula is made with only organic and natural ingredients.

It can be applied to the lips and to the skin. We believe in the hidden secrets of hemp. Do not use chemicals on your skin, nature is way more powerful and safe for your body.

Endoca lip balm contains decarboxylated CBD using a gentle heat to change CBDa into CBD. Our method preserves the active cannabinoids, terpenoids and flavonoids.

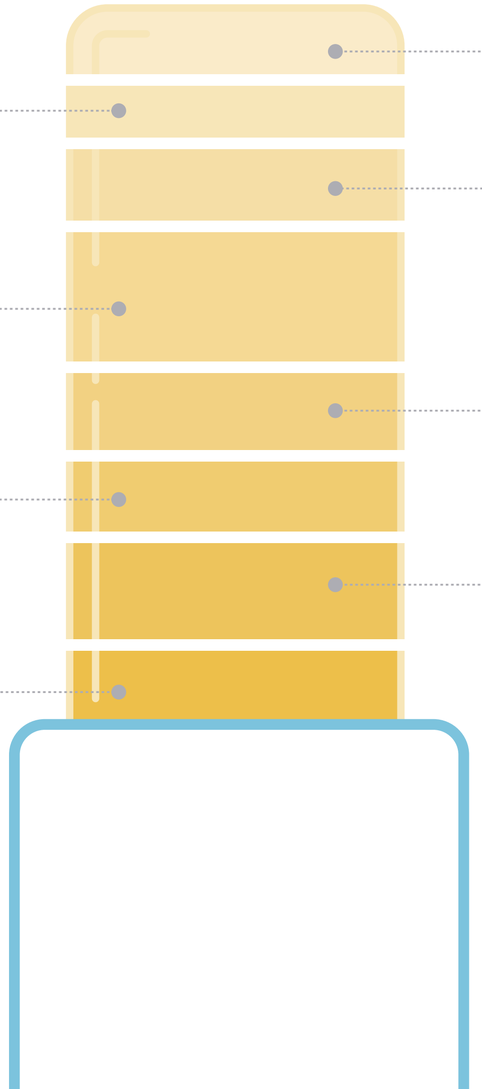

- 4,25gr contains 20mg of CBD.

Ingredients

Coconut oil, beeswax, hemp seed oil, lemon peel oil, hemp extract (CBD), vanilla extract, honey, vitamin E. All-natural food-grade ingredients and no synthetic fragrances. *Cannabidiol (CBD) is a natural constituent of the hemp plant. No preservatives, artificial colors, gluten free and cruelty free.

CBD CONSUMABLES

HEMP OIL DROPS

Simple & Effective

Our hemp oil drops are an easy way to administer and consume cannabinoids, including cannabidiol (CBD).

The absorption rates are much higher when hemp oil is taken in a liquid form. For this product the hemp extract is blended in organic hemp seed oil rich in omega 3 and 6.

Ingredients

Contains only full spectrum organic certified hemp oil from hemp, CBD+CBDa, Omga-3, Omega-6, along with naturally occuring terpenes and cofactors from hemp.

Available 10ml & 30ml as:

Raw CBD oil 300mg CBD+CBDa

Heated CBD oil 300mg CBD

Raw CBD oil 1500mg CBD+CBDa

Heated CBD oil1500mg CBD

Perfect for strong CBD doses.

HEATED

DECARBOXY-WHAT?
Decarboxylation is the technical term for the heating process that is applied to hemp to convert CBDa into CBD.

HOW DOES IT WORK?
Decarboxylation can happen in the lab, or naturally in the hemp fields from the heat of the sun. Natural heat from the sun is never high enough for total decarboxylation, so when heat is applied in the lab, total decarboxylation occurs.

WHAT'S THE DIFFERENCE?
The most dominant cannabinoid in heated Hemp Oil is CBD. Raw CBD extracts contain more of the acidic compounds, like CBDa, that are found naturally in the hemp plant. These compounds are usually lost when heat is applied.

VS

RAW

HOW DOES THIS AFFECT MY EXTRACT?
Many plant compounds are heat sensitive and decarboxylated extracts will always contain a smaller spectrum of plant compounds.

RAW EXTRACTS
The Supercritical extraction method doesn't require heat to process our Raw CBD Oils which allows us to retain vital minor cannabinoids, flavonoids and terpenes.

WHAT ARE THE BENEFITS OF RAW?
Although research has focused mainly on CBD and THC, there is early research that suggests there are benefits to other cannabinoids such as CBDa.

"ENTOURAGE EFFECT"
The hemp plant contains over 80 cannabinoids that all work together in synergy. At Endoca we are firm believers in the therapeutic powers of whole plant extracts, meaning the more cannabinoids and vital compounds the better!

HEMP OIL CAPSULES

Best for precise dosing

Capsules are ideal for precise dosing of cannabinoids, including Cannabidiol (CBD).

They're extremely easy to swallow due to their smooth texture and taste.

Ingredients

Contains only full spectrum organic certified hemp oil from hemp, CBD+CBDa, Omga-3, Omega-6, along with naturally occuring terpenes and cofactors from hemp.

CBD CHEWING GUM

High bioavailability

Chewing gum increases the effectiveness of CBD. Our chewing gum is organic and made from a traditional recipe of natural rainforest chicle gum without the use of plastic or synthetic ingredients. Endoca CBD chewing gum is environmentally friendly and 100% biodegradable.

Normal chewing gum is a huge environmental problem. It is the world's second most common form of litter after cigarette butts and swallowed chewing gum often ends up in your toilet since it's not biodegradable and passes straight through your gut.

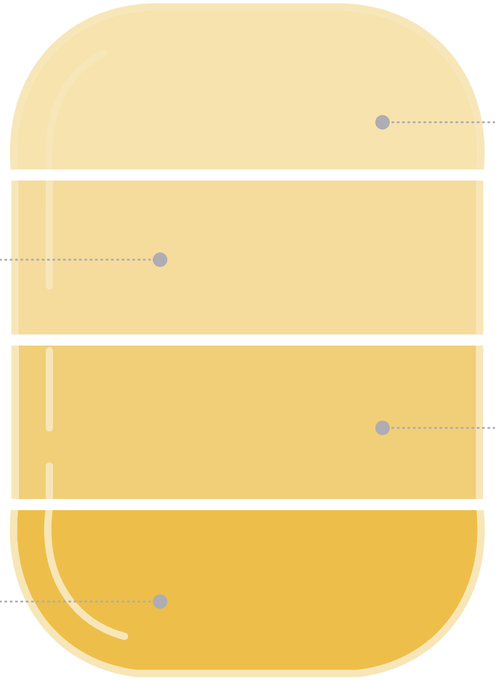

Ingredients

Chicle gum base, xylitol, hemp oil extract, peppermint, menthol and sunflower lecithin.

DISCOVER WHAT'S INSIDE CBD CHEWING GUM

- 100% organic hemp

WATCH OUR LAB REPORTS HERE

WHY DO WE USE GLASS CONTAINERS?

GLASS DOESN'T LEACH CHEMICALS INTO OUR PRODUCTS

Our salve mixture is poured at high temperatures directly into the containers you buy. We here at Endoca have always felt that pouring warm liquids into plastic was not the safest choice. While many companies are now using BPA-free plastics, our team has found new research evaluating more than 450 plastic products which has concluded that "Almost all commercially available plastic products leach chemicals that have reliably-detectable EA. In some cases, BPA-free products released chemicals having more EA than BPA-containing products."

Now, more than ever, it's clear that glass is the safest packaging choice.

GLASS IS FULLY RECYCLABLE

All of our containers can be recycled into new glass products over and over again. Current estimates state that only about 10% of plastic is recycled and that most plastic bottles that are recycled can't be turned into new plastic bottles. Rather, this plastic has to be "downcycled" into other lower quality products. Here is where recycling often hits a "dead end" - becoming so degraded that they can't be recycled further - and form part of a permanent waste stream.

GLASS IS REUSABLE

Our glass jars are safe and reusable which is why we always encourage you to find new ways to use them once you've finished your Endoca product. We suggest lining up our bottles on your window sill with little bouquets of spring flowers or use our jars to hold jewelry, a votive candle, or even your own homemade lip balm - the possibilities are endless!

GLASS REDUCES PLASTIC PRODUCTION

Every piece of plastic we've ever used and thrown away still exists. Every glass jar we use here at Endoca is one less plastic container created, discarded and left filling up a landfill somewhere around the world.
